

Scaling Sustainable Agriculture

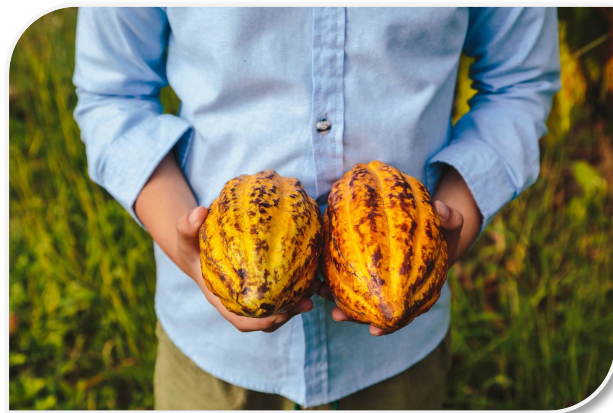

Peirot is a sustainable, ethical and profitable agriculture venture located in Western Bahia, Brazil.

Let's grow together.

We aspire to provide a more environmentally-friendly and ethical alternative to conventional sources by cultivating on a significant scale with over 16,000 hectares of land in Brazil.

Tropical crops thrive in the high solar radiation and temperatures in our region.

In addition to our primary crop, cacao, we will also plant sesame and mango. We are cultivating coconut trees and will grow trees for wood including mahogany and teak. As we expand our farm, we are excited to establish partnerships and explore new crops.

Environmental, Social and Governance (ESG)

We provide a distinct advantage for investors and buyers seeking opportunities to meet their ESG criteria.

We care for the environment and our local community, treating our employees and vendors as part of our extended family.

Capability

We have the resources to scale with your demand

Sustainability

We protect the environment and our local community.

Innovation

We use the latest agriscience and technology.

Our Farm by the Numbers

16,000
Hectares
(approx. 40,000 acres)

20,000
Coconut Trees
(Currently Planted)

60,000
Cacao Trees
(2024 Estimate)

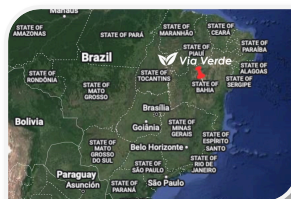

Location. Location. Location.

Located in the world-renowned Bahia region of Brazil, Peirot is well poised to reap bountiful harvests.

While our land is in a semi-arid area, the São Francisco River and Rio Grande run through our farm, providing abundant water sources. As a result, we are not cutting any trees to plant on our farm. In fact, we're leaving a positive impact on the environment.

Our land is relatively pest-free and we are currently the largest agricultural employer in our area. By caring for the environment and supporting our local community, we are planting the seeds for long-term growth.

Brazil provides a stable infrastructure.

Bahia is a powerhouse agricultural region.

Barra offers abundant water sources and beneficial partnerships with local vendors

Our Team

We put our farmers first.

We consider the people who work on our farm as part of our extended family. Beyond safe and fair working conditions, we promote and support improvements to the quality of life throughout our local community.

Creating jobs, transforming lives.

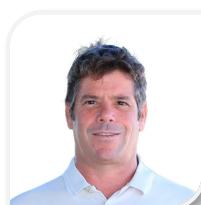

We currently employ over 60 people and seek to employ more than 500 people in daily operations including cultivation, harvesting, equipment operation and maintenance. We actively train and support the development of our team, encouraging them to improve their skills and advance to management.

Executive Team

Dr. Ido Schechter is an accomplished technologist, agricultural innovator and executive. As the CEO of Peirot, he oversees the growth, strategic partnerships and long-term vision of the company.

Tal Bar-Dor is an experienced manager and director. As the COO of Peirot, his love for the local community and innovative use of the latest agricultural technology is vital to our mission of scaling sustainable agriculture.

Let's start a conversation.

We're excited to discuss new ventures and partnerships. Please contact us through the information below. We look forward to working together.
